

How To Use Times Tables Revision Cards

Times Tables Revision Cards is the unique complete Learning, Practising, Testing and Revision system for learning Times Tables.

If students do these cards regularly they will learn the Times Tables facts very quickly!

(1) IMPORTANT: FOLD AND UNFOLD TO SEE THE ANSWERS!

Each sheet is self contained!

You can start with sheet 1, sheet 2 or sheet 3 depending on whether just starting the times table or if pupils have already done some work on it.

The answers are on the top left section on each sheet.

Fold the sheet over to do the practice tests.

Unfold to check and mark the answers.

(2) STUDENTS MUST MARK THEIR OWN ANSWERS!

Students **MUST** mark their own answers!

This is a vital part of the learning and improving cycle.

Even quite young children (aged 6 and 7) can do this accurately and sensibly.

Students must have full ownership and responsibility for their learning progress and development to get the maximum benefit – this is the unique Revision Cards approach.

Students are always curious to see how they have done and by marking their own work they can see immediately what is correct and what they still need to learn (they can highlight these facts on the top left section).

Students benefit from having to find the answers in the times tables as it helps to 'undo' any incorrect thinking and reinforces the correct results. This process of marking also helps students to recognise their progress and they can concentrate on particular Times Tables facts before having another go and doing another practice test.

THIS MAKES THE REVISION CARDS SYSTEM DOUBLY USEFUL:

- STUDENTS BENEFIT MORE FROM THIS LEARNING CYCLE
- THE PARENT OR TEACHER CAN FOCUS ON SOMETHING ELSE WHILE THE STUDENT IS DOING THE TIMES TABLES WORK

This self-marking and feedback cycle is much more beneficial than just being told you have '8/12' correct.

(3) TRICKY FACTS!

There will be some 'tricky' times tables facts that individuals will find difficult to remember.

(i) Students can write these facts on the 'My Own Tricky Mixed Questions' sheet, and can then make their own practice tests based on these tricky questions.

(ii) Students can also write these tricky facts on the flash cards blanks that are provided, and can draw their own memorable picture to help them remember it.

(4) SUGGESTED PROGRAMME

DAY 1: Sheet 1 (part or all)

DAY 2: Sheet 1 again (finish or do again)

DAY 3: Sheet 2

DAY 4: Sheet 2 (finish or do again)

DAY 5: Sheet 3 Student makes their own questions and test themselves

After 5 days a lot of these Times Tables facts will be starting to go into the student's long term memory.

Doing more sheets will help reinforce these facts and improving students' familiarity and speed.

One Times Table a week works very well for many pupils.

The Revision Cards Times Tables system builds into a complete programme for learning The Times Tables and improving Times Tables speed.
